

Notice of Intent to Remediate

Pursuant to the Land Recycling and Environmental Remediation Standards Act, the act of May 19, 1995, P.L. 4, No. 1995-2, notice is hereby given that Neville Township has submitted to the Department of Environmental Protection a Notice of Intent to Remediate for the 13.5-acre Site located directly north of the Ohio River, east of the I-79N exit ramp, and south of 5701 Grand Avenue in Neville Township, Allegheny County, Pennsylvania. The Site is currently vacant and unimproved. The Site has been found to contain heavy metals in soil at elevated concentrations. The Remediator plans to demonstrate attainment of a site-specific remediation standard for the identified metals in soil. The proposed remediation measures will include demonstration of pathway elimination through establishment of appropriate engineering controls. The Site is proposed to be redeveloped for recreational park space. The Act provides for a 30-day public comment period for site-specific standard remediations. The 30-day comment period is initiated with the publication of this notice. Until April 9, 2024, individuals within the municipality may submit a request to Neville Township for the development and implementation of a public involvement plan pertaining to the development of the remediation and reuse plans for the Site. Copies of these requests and of any comments should also be submitted to the RT Environmental Services, Inc. at 2001 Waterdam Plaza Drive, Suite 205, Canonsburg, PA 15317, as well as the Department of Environmental Protection at 400 Waterfront Drive, Pittsburgh, PA 15222.
