

**THE MCCANDLESS
TOWNSHIP SANITARY
AUTHORITY NOTICE TO
ACCEPT PROPOSALS
FOR
TRANSPORTATION AND
DISPOSAL OF SEWAGE
SLUDGE**

The McCandless Township Sanitary Authority (MTSA) is now accepting sealed proposals from licensed landfill companies for the Transportation and Disposal of Sewage Sludge. Proposals should be mailed or delivered to at 418 Arcadia Drive, Pittsburgh, PA, 15237. Envelopes should be clearly marked Sludge Proposal Enclosed. Proposals will be accepted until **Monday April 1, 2024 at 11:30 a.m.**, and will be opened at that time. If you should you have any questions or require more information, please contact Edward Bricker at 724-935-8050. The proposal should be based on a twenty-four (24) month period beginning May 1, 2024. The sludge is dewatered by a Flottweg Centrifuge and/or by a Roediger Belt Filter Press and then stabilized with quicklime. Dump trailers with liners are to be provided by the hauler, no roll-offs are to be used. Each dewatered sludge load will be approximately 22 tons. Sludge is normally dewatered Monday through Friday producing up to one 22-ton load per day. This can vary depending on the season, sludge inventory, and equipment failures etc. MTSA reserves the right to vary the number and frequency of the loads. The award of the contract will be contingent upon MTSA acquiring a disposal permit for the landfill, if MTSA is not currently permitted to dispose sewage sludge at the awarded site. MTSA reserves the right to reject any or all proposals, to negotiate final contract terms with any proposing company and to award a contract with a proposing company that is considered by MTSA to be in the best interests of MTSA. Attached please find a copy of the latest FORM 43 Sludge analysis for 2024, for your use in preparing your proposal.
