Techstra Solutions LLC, headquartered in Pittsburgh, PA, seeks a Senior Data Governance Analyst to bridge information technology engineering and business needs for technical requirements, data correlation, and data analyses, primarily for clients in the financial industry. This is a Pittsburgh-based hybrid position with a requirement of 3 days per week in the Pittsburgh office. Specific duties include: (i) consulting with business stakeholders to understand their objectives and data needs; (ii) writing and running standard query language ("SQL") queries for data analyses, inquiries, and extractions; and (iii) leveraging data models to visualize data structures, physical and logical data models, and complete source data. Please apply at: www.techstrasolutions.com/openjobs.
